# CONVERGECONF

A TECHNOLOGY CONVERGENCE CONFERENCE

## DECEMBER 15th-16th

KAKINADA

#CONVERGECONF
2017

Why ConvergeConf ?

Today, Technology is advancing rapidly and so is its implementation. With its agile nature, comes the need to harbor the skills required to use this technology and at the same time be aware of it. Several websites, online forums, videos, etc. are available online to help one out on their quest to learn new technology, but nothing comes close to the way in which a conference can contribute to the development of new skills. But conferences are generally confined to major metropolitan cities and are inaccessible by towns and parts of rural India. Converge Conf is here to change this very notion and bolster students to rise, create and excel in their careers.

Tracks in Conference
Artificial Intelligence
Machine Learning

Distributed Systems

Language
Semantics

Cloud Infrastructures

Blockchain

Speakers

Tummala Nageswara Rao
